

## We'd Like to Offer Your Residents a Free Technology Workshop

No cost to your community. No sales pitch. Just helpful, hands-on tech education for seniors.

### What the Workshop Covers

- **Smartphone Basics**  
Calls, texts, photos, video chat, contacts
- **Spotting Scams**  
How to recognize fraud calls, texts, and emails
- **Staying Safe Online**  
Safe browsing, strong passwords, privacy
- **Useful Features**  
Camera, maps, reminders, voice assistants
- **Q&A + Hands-On Help**  
Residents bring their own devices
- **Custom Topics**  
We tailor content to your residents' needs

### Who We Are

Senior Tech Care is a service from District Tech Group, a local DC Metro technology team that helps seniors feel comfortable, confident and safe while using their devices. It started after seeing how frustrating technology can be when no one takes the time to explain it. So we built a simple, patient approach that puts people first.

**We're local, we're patient, and helping seniors is what we do.**

### How It Works

- 1 You pick a date and time**  
Mornings, afternoons, or weekday evenings – we're flexible.
- 2 We come to your community**  
We bring everything. Residents just need their device.
- 3 We teach for 60–90 minutes**  
Interactive session with hands-on help and Q&A.
- 4 Residents leave confident**  
And if anyone wants ongoing support afterward, we're happy to answer questions.

### Completely Free • No Obligation • No Sales Pitch

We offer these workshops as a community service. No cost and no commitment of any kind.

### What Your Residents Walk Away With

- Confidence using their device for calls, texts, photos, and video chat
- Knowledge of how to recognize and avoid common scams
- Practical skills they can use immediately – not just theory
- A point of contact for future tech questions
